Art Unit: 1762

1. The amendment filed 6/14/05 has been considered and entered. Claims 2-21 and 46-50 have been canceled. Claims 1 and 22-45 remain in the application.
2. In light of the amendment and Terminal Disclaimer filed 6/14/05, the rejections of record have been withdrawn.

In review of the application, the Examiner realized that a Terminal Disclaimer over allowed Application 09/813,076 should also be recorded. A telephone call was made to obtain the TD, however, the TD has not been received as of the date of this Office Action.

### *Specification*

3. The disclosure is objected to because of the following informalities: \*\*\*  
On pg. 1, line 2, the phrase "now \_\_\_\_\_" appears to have missing information.  
Appropriate correction is required.

### *Double Patenting*

4. Claim 1 is provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of copending Application No. 09/813,076. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Art Unit: 1762

A telephone call was made to the attorney noting this issue and the Attorney agreed to cancel the claim to obviate the rejection. The Examiner suggests the Attorney to take such action in response to this Office Action.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

5. Claims 22-45 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 22-45 of copending Application No. 09/813,076. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference between the two sets of claims is that the method including forming a seal between two housing parts and a printed circuit board whereas the instant claims recites a seal between a housing part and a printed circuit board.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1762

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).
